Preface v
Committees and Sponsors vi

Chapter 1: Advanced Machining and Surface Engineering, Assembling Technologies

Structural and Technology Support Quality Improvement of Gear Coupling
A. Mikhaylov, R. Grubka, A. Lahin, A. Nedashkovskiy and A. Guitouni ....................................................3

Increase of Firmness of Milling Cutters with Variable Cutting Velocities along the Length of Teeth Cutting Edges
T. Al-Sudani, A. Mikhaylov, H. Dolhykh, S. Selivra and Z. Sahbi ...............................................................8

Optimization of the Tool Life and the Cutting Speed in Terms of Productivity at Drilling of the Stainless Steel 10TiMoNiCr175
A. Vlase, O. Blăjină and B. Vlase ................................................................................................................ 13

Mathematical Model for Economic Optimization of the Tool Life and the Cutting Speed at Drilling of the Stainless Steel X6CrNiTi18-10
O. Blăjină, A. Vlase and V. Darie ................................................................................................................ 18

Intensification of Finish Turning of Stainless Steels with the Use of Technological Cutting Fluids
V. Boguslavskiy, T. Ivchenko, V. Polchenko and I. Navka........................................................................ 23

The Influence of the Lubrication Method and the Cutting Regime on the Surface Roughness when Milling 7175 Aluminum Alloy
V. Diciuc, M. Lobontiu, G. Bran and V. Lazar......................................................................................... 28

Contribution at the Calculation and Variation in Time of the Surface Roughness Produced by Turning Process
C. Buzatu and I.A. Orzan ............................................................................................................................. 33

Study of the Uncut Chip in 5 Axes Ball Nose End Milling for the Third Quadrant of the Tool Inclination
M. Cosma ..................................................................................................................................................... 37

Performance Analysis of a Layout of an Assembly Line Supplied Based on Stock or Synchronous
E. Niţu, A. Rotaru and A.C. Gavrilaşu ........................................................................................................... 42

Experimental Design Methodology in Ball End Milling of C45 Material by Using Tool Tilt Angle - Analysis and Estimation of Surface Roughness Variation
I. Pasca, M. Lobontiu, R. Čep and M. Banica......................................................................................... 48

Contributions on the Influence of the Cutting Parameters and Constructive Geometrical Parameters of the Tool on the Precision of the Worm Gears Manufactured Using Whirling Thread Cutting
G. Cretu and M. Coteaţă ............................................................................................................................. 54

Influence of the Temperature and Mechanical Stresses Generated by Milling Process in Machined Part Surfaces on their Accuracy
N.C. Tâmpu, M.C. Radu and B.A. Chirita................................................................................................... 59

Mathematical Modeling of Thermocurrent Parameters for Roughness Assessment in Turning
C.A. Cirstoiu ................................................................................................................................................ 64
# Design of an Automatic Tool Changer System for Milling Machining Centers
C. Obreja, G. Stan, D. Andrioaia and M. Funaru ................................................................. 69

# V Prism Special for Centering Devices
E. Pământăş and F.V. Banciu .............................................................................................. 74

# Technological Failures Research at Aluminum Parts Processing on Automatic Lathes
E. Pământăş and C.G. Turc .............................................................................................. 79

# Computer Aided Measurement of Elastic Deformations of a Work Piece in the Turning Process
M. Boca, G. Nagit and M. Horodinca ................................................................. 84

# Cooling Capability of Cutting Fluids in Grinding
G.X. Yin and I. Marinescu .............................................................................................. 89

# Basic Research for the UV Fixed Abrasive Lapping Plate
I. Marinescu, L. Guo and P. Wei .................................................................................. 95

# The Study of Elastic Strains of Parts from the Grinding Technological System
M. Casian .................................................................................................................. 101

# A Comparison between the Wear of the Ball Nose End Mill Generated in 4 Axes Milling and in 5 Axes Milling
V. Diciuc ................................................................................................................... 106

# Experimental Researches upon Changes of a Pipe's Roughness after Hydroformation
B.C. Vaceanu, G. Nagit and V. Huian .......................................................................... 111

# Functional Modeling of an Assembly Line Supplied in Synchronous
A. Rotaru, A.C. Gavriluţă and E. Niţu ........................................................................ 116

# High Precision Rotary Table Used on Milling Machining Centres
L. Mihăilă, G. Stan, C. Obreja and M. Pascu .............................................................. 121

# Surface Integrity of Ti6Al4V Alloy under Dry Sliding Conditions
Z. Doni, M. Buciumeanu and L. Palaghian .................................................................... 126

## Chapter 2: Forming Technologies

# Determination of Technological Forces in the Incremental Forming Process
R. Breaz, M. Tera, O. Bologa and G. Racz .................................................................... 133

# Applying the Networks Division Method for Studying the State of Deformation of Semi-Finished Sheet Submitted to Technological Cutting Operations
A. Stancioiu and L. Luca ............................................................................................... 138

# Influence of the Blankholder Force on the Accuracy of the Rectangular Drawn Parts Made from Steel Sheets
N. Nanu, G. Brabie and M. Bologan ............................................................................. 143

# The Residual Stress State Generated by Single Point Incremental Forming of Aluminum Metal Sheets
C. Radu, E. Herghelegiu, C. Tampu and I. Cristea ..................................................... 148

# Influence of the Clearances in the Stamping Device upon the Burrs Resulted on the Stamped Bearing Cages Windows

# Simulation of the Pressing Process with Combined Forces by Using ABAQUS Software
A. Mardari and S. Mazuru ............................................................................................ 158

# Influence of the Thickness Value on the Mechanical and Formability Properties of the CuZn37 Thin Sheet Metal
G. Brabie, N. Nanu and A. Jitaru ................................................................................ 163
Experimental Researches on the Limit Angle of Conical Parts Manufactured by Single Stage Incremental Forming on CNC Lathes
I. Neagoe, A.C. Filip and M.A. Vasiloni ................................................................. 168

Drawing Study of Sheet Bimetallic Brazed Parts
I. Olaru ......................................................................................................................... 173

Blank Shape Optimization in Deep Drawing with Combined Restraint
V. Paunoiu and V. Teodor .............................................................................................. 178

Methods to Increase the Rigidity of the C-Frame of a Press
I. Dan and R. Cioară ..................................................................................................... 183

Dimensional Accuracy of the Molds Built on Rapid Prototyping under the Influence of the Investment Casting Heat Processes
A. Coman, S. Rodean, D.V. Leordean and C. Patalita .................................................. 188

Chapter 3: Non-Conventional Technologies in Manufacture and Industry, Welding Technologies

Dimensional Analysis of Electro-Separation Kinetics of Particles from Dielectric Liquids
T. Sajin and C.N. Ostahie .............................................................................................. 195

Rapid Manufacturing of Microwave Circuits on Low-Cost Substrates Using Laser Machining
M. Ghulam, A.Y. Hu, J.G. Miao and L. Gherman .......................................................... 200

Experimental Research on Quality Assessment of Ultrasonic Cleaning Process
L. Butu, M. Marinescu, C. Borda, D. Arsene and I. Slavchev .......................................... 205

Economic Efficiency of Using Rapid Prototyping Technology
C. Gavrus ..................................................................................................................... 210

Aspects of Finite Element Analysis of Microdrilling by Ultrasonically Aided EDM and Related Knowledge Management
D. Ghiculescu, N. Marinescu, D. Ghiculescu and S. Nanu ........................................... 215

Customer Matrix with Different Time Horizons Applied to Electrodischarge Machines
D. Ghiculescu, N. Marinescu, D. Ghiculescu and C. Pirnău .......................................... 220

Specific Aspects on Modelling and Simulation of the Synchronized Ultrasonic Assistance of the Electro-Discharge Machining Process
S. Nanu, N. Marinescu, D. Ghiculescu and C. Pirnău .................................................. 225

Photogrammetric Scanning Technique and Rapid Prototyping Used for Prostheses and Orthoses Fabrication
O. Ciobanu, G. Ciobanu and M. Rotariu ....................................................................... 230

Environmental Attributes of EDM Process
D. Soaita ....................................................................................................................... 235

Influence of the Distance between the Cutting Head and Working Sample on the Geometric Precision in Water Jet Abrasive Cutting Process
E. Hergheliegiu, C. Radu, C. Schnakovszky and I. Cristea .......................................... 240

High Pressure Water Jet Cutting of the Al 6061 T651 Aluminum Alloy
E. Hergheliegiu, C. Radu, C. Schnakovszky and I. Cristea ........................................ 245

Industrial Parts for Investment Casting Built on the Rapid Prototyping Systems
A. Coman, A. Gebhardt, C. Patalita and D.V. Leordean ............................................. 250

Aspects Regarding the Technologies on Wire EDM CNC Machines
I. Mocian and R. Cazacu ............................................................................................... 255
Modeling by Finite Element Method of Thermal Field when Coating with Stellite Welding of Valvetype Parts
G. Gârleanu, V. Popovici, D. Gârleanu and C. Luchian ................................................................. 260

Researches about Mechanical Characteristics of some Steels Resistance Spot Welded
M.I. Chirileanu and D.A. Gheorghiu ............................................................................................... 265

The Influence of the Diffusion on Adherence of the 60T Deposits Obtained by Thermal Spraying in Electric Arc
S.L. Toma, D.A. Gheorghiu, S. Radu and C. Bejinariu .................................................................... 270

Investigation Concerning Maximal Forming Depth of Tailor Welded Blanks Made from same Material but Different Thickness Ratios
A. Albut ............................................................................................................................................... 275

Research on Producing Complex Metal Parts with Lattice Structure by Selective Laser Melting
V. Mager, N. Bâlc, D. Leordean, C. Dudescu and M. Fockele ....................................................... 280

Some Aspects Regarding Micro-Scale EDM Drilling Process
O. Dodun, C.E. Panait and L. Gherman .......................................................................................... 285

Machinability Evaluation by Single Electrical Discharge
L. Gherman, I. Palaghia and L. Slătineanu ......................................................................................... 290

Workpiece Clamping at Laser Beam Machining
G. Nistoroschi and G. Bosoancă ....................................................................................................... 295

Formation of the Optimal Machining Process Based on the Analysis of Design and Technological Dimension Relations
A. Toca and I. Stingaci ...................................................................................................................... 300

Diminishing Shape Errors at Electrical Discharge Machining of External Cylindrical Surfaces
L. Slătineanu, M. Coteață, L. Gherman, I. Beșliu, M. Radovanovic, C. Mîrcescu and S. Ștoica ......... 305

Comparative Analysis of the Quality of Parts Made by an Aluminum Alloy Processed by Unconventional Cutting Methods
C. Radu, E. Herghelegiu, C. Schnakovszky and I. Cristea .............................................................. 310

Direct Moulding of Rubber Granules and Powders from Tyre Recycling
F. Quadrini, D. Bellisario, L. Santo and I. Hren ............................................................................. 315

Chapter 4: Advanced Materials and Construction Technologies

Drying Process Modelling for Heavy Clay Products Using a New Thin Layer Drying Model
M. Vasić and Z. Radojević................................................................................................................. 323

Experimental and Mathematical Considerations on Roughness Resulting from "ATSi12CuMgNi" Turning Alloys Using Poly-Crystalline Diamond Tools
A. Zapciu, I.S. Munteanu and A. Zapciu .......................................................................................... 328

Spring-Back of Pre-Strained High Strength Steel Stripes
B. Chirita ............................................................................................................................................... 333

Studies Concerning the Corrosion Behaviour of the Cast Stainless Steel Used for Chemical Industry
G. Simionescu and M. Gheorghian .................................................................................................... 338

Studies Concerning Variation of the Friction Coefficient in Case of Polymeric Composite Materials Reinforced with Carbon Fibers
R. Căliman ........................................................................................................................................... 343
Experimental Studies Regarding Mechanical Behaviour of Textile Reinforcements
Laminated Composite Materials
M. Oleksik, N. Cofaru and V. Oleksik

The Corrosion Resistance of NiTi-Active Element before and after
Thermo-Mechanical Solicitation
A. Ursanu Dragos, S. Stanciu, R. Cimpoeșu, I. Ionita, M. Rațoi, T. Constantin,
I. Cimpoeșu and M. Agop

Object Oriented Finite Element Analysis on Microstructure for W1.8507
C. Nejneru, M. Axinte and M.C. Perju

Researches Regarding Ti/W/TiC Triple Layers Deposition on the Ferritic-Pearlitic Cast
Iron Support, Obtained by Electro-Spark Deposition Method
C. Nejneru, M.C. Perju and M. Axinte

Preliminary Results of Copper Based Shape Memory Alloys Analyze Used for
MEMS Applications
N. Cimpoeșu, A.D. Ursanu, S. Stanciu, R. Cimpoeşu, B. Constantin,
C. Paraschiv and S.O. Gurlui

Correction to the Wills-Harrison Approach: Influence on the First Minimum of the
Effective Pair Interaction
N. Dubinin

Researches on Mechanical Proprieties of Wooden Materials Used in
Furnishings Production
L. Butnar and H. Cioban

Controlled Properties of the Thin Films of Ni_{0.8}Zn_{0.2}Fe_{2}O_{4}- BaTiO_{3} Ferrite-Ferroelectric
Nanocomposites - Simulational Study
D. Ionescu and M. Kovaci

Simulation Determination of the Electromagnetic Parameters for the CdCr_{2}S_{4} Multiferroic
Relaxor in GHz Range
D. Ionescu and M. Kovaci

Research Concerning the Optimum Extrusion Temperature for Reinforced Polyamide
A. Popescu, L. Hancu and P. Bere

Chapter 5: Flexible Manufacturing, Automation and Robotics in
Technological Processes

Automated Stand for Non-Destructive Testing Evaluation of Metal Products
D.T. Cicic, C.G. Amza, D. Popescu and D. Anania

The Influence of Kinematic Joints Clearances on the Positioning Accuracy of 3DOF Delta
Parallel Robots
D. Andrioaia, G. Stan, M. Funaru and C. Obreja

Poly-Articulated System with Spatial Positioning
G. Stan

Robot-Forming - An Incremental Forming Process Using an Industrial Robot by Means of
DELMIA Software Package
I. Chera, O. Bologa, G. Racz and R. Breaz

Transmission Ratio Optimization of Electric Driven Palletizing Mechanism
L. Mihăilă, G. Stan, M. Funaru and D. Andrioaia

The Automatic Configuration Method of Modular Structures Composing Multi-Axis Heads
A. Babă, M. Iordache, E. Nițu, A. Costea, D. Iacomi and S. Tonoiu
Application of Tree Graph Method for Reducing the Total Time of Tool Changing in Milling and Boring Machine Tools
C. Obreja, G. Stan, L. Mihăilă and M. Pascu

Neck Design Solution Adopted in the Development of a New Social Robot
F. Adăscăliței, I. Doroftei and B. Vanderborght

Chapter 6: CAD/CAM/CAE/CAx Technologies, Manufacturing Optimization

Advanced Integrated Design Method for Fatigue Assessment of Large Elastic Ship Structures
I. Rubanenco, I. Mirciu and L. Domnisoru

FEA Study on the Elastic Deformation Process of a Simple Bimetal Beam
M. Aignătoarea

Harmonic Gear Modeled in SolidWorks
M. Urdea

CAD and CAE Analysis of Devices Connection Cable, DLC-1, 2 and 3
V. Itu, I. Dumitrescu and B. Cozma

Alternative Method for Segmenting Digitized Data in Reverse Engineering
G. Nagit and A.M. Mihalache

Converting Point Cloud to Revolved Solids
M.V. Drăgoi and S. Navalușić

Customized Software Tools Integrated in Reverse Engineering Process of Rectangular Parts with Holes
G. Oancea, A. Manolescu, I. Bădan and R. Pescaru

Estimating the Life-Cycle of the Medical Implants Made by SLM Titanium-Alloyed Materials Using the Finite Element Method
R. Păcurar, A. Păcurar, N. Bâlc, A. Petrilak and L. Morovič

Constructing 3D Surfaces from Random Sets of Points by Means of Level Curves
R. Cazacu and L. Grama

Intelligent Management of Dies and Molds CAD Projects
I. Mocian and R. Cazacu

Graphical Representation of Solids - An Important Issue in Teaching Technical Drawing
R. Clinciu

About CAD Activities Effectiveness and Efficiency as Instruments for Sustainable Product Development
V. Merticaru and M.I. Ripanu

3D Parametric Modeling for Complex Parts Generation
C. Stan, M. Zapciu, M. Parashchiv and M. Ungureanu

Modeling of Stress in Drills with Curved Cutting Edges
N. Baroiu, D. Boazu, C.A. Vasilache and V. Teodor

Designing an Innovative Face-Milling Cutter
P.D. Brîndașu, G.V. Oniță and L.D. Beju

3D Measuring of Complex Automotive Parts by Multiple Laser Scanning
A.C. Voicu, I.G. Gheorghe, L.L. Badita and A. Cirstoiu

Study of Cooling Parameters Using Fluid Jet in Milling Process Simulation
D.I. Nedelcu and I. Olaru

Virtual Simulation of Plastic Injection Technology for Medical Devices
M. Catana, D. Tamita and V. Diorduc
Study of Flow Font Advancement during Filling Stage of a Spiral Mold  
I.L. Sandu, F. Stan and C. Fetecau ................................................................. 534

Studies about Movement Biofidelity of a Dummy Neck Used in an Impact Testing Device  
S. Ciunel, D.L. Popa and N. Dumitru .......................................................... 539

Parts in CATIA Based on Reverse Engineering Technique  
R. Pescaru, G. Oancea and L. Parv ............................................................. 544

Modeling, Simulation and Optimization of a Human Knee Orthotic Device  
M. Catana, D. Tarnita and D. Tarnita ....................................................... 549

Ankle Foot Orthoses with Wire Insertion  
M. Badescu, C. Purcar and D. Badescu ................................................. 554

Chapter 7: Mechanical and Manufacturing Equipment, Devices and Instrumentation, Design and Analysis

Theoretical-Applicative Research on Design and Implementation of a Special Dynamometer  
M. Intăţ, A. Muntean and C. Drăgoi ......................................................... 561

Dimensional Stability Analysis of Unconventional Treated Steel Bearings  
M. Gheorghian and R. Căliman .................................................................. 566

Numerical Analysis of Load Carrying Capacity in the Contact between High-Order Surfaces  
S. Spinu and D. Gradinaru ........................................................................ 571

A Numerical Study of the Partial Slip Elliptical Contact under Fretting Conditions  
S. Spinu and D. Gradinaru ........................................................................ 576

The Influence of the Operating Conditions on the Lubrication Regimes of Ball Screws  
G.C. Puiu and V. Puiu ............................................................................... 581

Assessment Procedure of Technological Consumption in the Natural Gas Distribution Systems  
I. Pana and M. Minescu .............................................................................. 586

A Study of an Ion-Drag Pump Characteristics  
C.N. Ostahie and T. Sajin ........................................................................ 591

Influence of Microtube Heating Geometry on Behavior of an Alumina Nanofluid at Low Reynolds Numbers  
A.A. Minea, R.S. Luciu and O. Manca ..................................................... 596

Study of Micro Hydropower Plant Operating in Gravitational Vortex Flow Mode  
M.G. Marian, T. Sajin and A. Azzouz ....................................................... 601

The Mathematical Model for Studying Bearing Reliability Unconventional Treated  
M. Gheorghian and G. Simionescu ......................................................... 606

Measuring System Analysis of the Video Equipments for Quality Measurements and Quality Control in the Automotive Industry  
I.A. Orzan and C. Buzatu .......................................................................... 612

Mathematical Model and Algorithm to Optimize the Construction of Adjustable Multi-Axis Heads  
E. Nițu, A. Babă, M. Iordache, A. Costea and D. Iacomi ............................ 617

Vibration Analysis Methods in Bearing Damage Detection  
C. Bujoreanu, V. Horga and B. Drăgan .................................................... 622

System for Compensating the Rigidity of the Hydrostatic Guideways of the Column Saddle Subassembly of the Boring and Milling Machines  
M. Pascu, G. Stan, D. Andrioaia and L. Mihăilă ........................................ 627
Device for Supplying the Hydrostatic Pockets with Compensation of the Fluid Temperature
M. Pascu, G. Stan, C. Obreja and D. Andrioaia .......................................................... 632

Researches upon the Maintenance of the Railway Wagons Brake System
B.S. Orhei Bercea, O. Lupescu and L.D. Bercea .......................................................... 637

Aspects of Mathematical Modelling of Heat and Mass Exchange at Burning of Droplet of Water Fuel Oil Emulsion
Ș.R. Buzdușă and T. Sajin ................................................................................................... 642

Modeling of Railway Vehicles for Virtual Homologation from Dynamic Behavior Perspective
M. Dumitriu ........................................................................................................ .......................... 647

Structural Analysis of a Flange Coupling without Clearance
D. Zahariea ......................................................................................................................... 652

Electrical Elements in Reduction of Mechanical Vibrations
K. Białas ............................................................................................................................ 657

Designing a Specialized Devices for Correction of the Axis Deviation at the Human Leg
I.I. Cofaru, P.D. Brîndașu and N.F. Cofaru ...................................................................... 662

Improving Functional Parameters for Hydro-Mechanical Systems from Treatment Station of Water
A. Alexandrescu and S.A. Miron .......................................................................................... 667

Design and Manufacturing of a Low Head Banki Turbine
C. Popescu ......................................................................................................................... 672

Optimal Pump Scheduling to Reduce the Operating Costs
S.A. Miron, A. Alexandrescu and M. Luca ......................................................................... 677

Heat Transfer Modeling for a Plate Heat Exchanger used in Solar Power Systems
I. Ivancu, D. Stanciu Dragomir, V.I. Crîsmaru and G. Dumitrascu ........................................... 682

Industrial Rollers in PUR Made for Slaughterhouses
B.K. Storm and L.A. Schjøtt .............................................................................................. 687

Determining the Calibration Life of Measuring Devices by Means of Parameter Deviation Function
R. Clinciu ............................................................................................................................. 695

Research on Accidental Defects to Bearings of Mining Equipment
C.F. Ciofu ............................................................................................................................ 700

Influence of Tool Clearance Values on the Quality of the Small Drawn Parts
G. Brabie, E. Costache and M. Bologan ............................................................................ 705

Influence of the Blank Initial State on the Quality of the Small Drawn Parts
E. Costache, G. Brabie and A. Jitaru .................................................................................. 710

Crashing Behaviour Analysis of TWB Thin-Walled Structures with Various Cross-Sections
V.A. Ciubotariu .................................................................................................................. 715

Procedure and Equipment for Circularity Test of Inner Section of Bent Tubes
C. Pisarciuc .......................................................................................................................... 721

Chapter 8: Innovation, Creativity, Learning and Education in Engineering

Research on Improving the Assessment Process of Students' Knowledge in the Field of Materials Processing
G. Strnad ............................................................................................................................ 729

Management and Assessment of Curricula in Technical Higher Education
A.F. Modrea and A. Peterlicean .......................................................................................... 734
Project-Based Learning in Higher Education
A. Peterlicean and F. Morar ....................................................................................................................... 739

The Importance of Teaching GIS in Engineering
T. Morar, I. Costescu and B.H. Muller ...................................................................................................... 744

Improving Teaching Staff Lifelong Learning Using Fuzzy Algorithms
C. Butnaru and A. Nedelcu ........................................................................................................................ 749

"Mechatronics Galaxy" a New Concept for Developing Education in Engineering
I.G. Gheorghe, L.L. Badita, A. Cirstoiu, S. Istriteanu, V. Despa and S. Ganatsios ................................... 754

The Role of Internship in Transversal Competence Development of Industrial Engineering Graduates
N. Ionescu, C. Doicin and M. Roșu ........................................................................................................... 759

Creative Teaching Methods for Educating Engineers
V. Grecu, C. Deneș and N. Ipiña ............................................................................................................. 764

Machine Learning and Creative Methods Used to Classify Customers in a CRM Systems
M. Cioca, A.I. Ghete, L.I. Cioca and D. Gîfu ............................................................................................ 769

Chapter 9: Industrial and Product Management, Quality and Evaluation

Advanced Quality Planning of Manufacturing Products - APQP
D.V. Ciobanu, A.E. Dumitrascu, C. Tudosoiu and S.A. Borz .................................................................. 777

Safety Evaluation of the Pipelines Systems for Petroleum Products
M. Minescu and I. Pana .............................................................................................................................. 782

Organization of Production Processes through the Multi-Service Method by Performing some Identical Operations of the same Duration and Structure
I.L. Grigorescu and G. Bălan ..................................................................................................................... 787

Optimizing the Thermal Physiological Comfort by Introducing Peltier Cells in Simulated Conditions
L. Vlad, S. Mitu and C. Buhai .................................................................................................................... 792

System for the Management of Raw Materials Based on RFID Technology
O. Ionescu and G.C. Ionescu ...................................................................................................................... 797

Advanced Product Quality Planning Reference Model in Automotive Industry
B. Chiliban, M. Chiliban and M. Ștefănescu ............................................................................................. 802

A Point of View on Functional Approaches Used in Product Design
F.V. Banciu, G. Drăghici and C. Turc ........................................................................................................ 807

Contributions to Ranking an Ergonomic Workstation, Considering the Human Effort and the Microclimate Parameters, Using Neural Networks
D.C. Anghel and N. Belu ........................................................................................................................... 812

Aspects of Quality Assurance in Glass Bricks Manufacturing Process
M. Rus, E. Mereuta and S. Veresiu .......................................................................................................... 817

Improvement of Process Failure Mode and Effects Analysis Using Fuzzy Logic
N. Rachieru, N. Belu and D.C. Anghel ........................................................................................................ 822

Improving the Company Performance by Using Energy Audit Method
A. Acioabanitei, C. Militaru, N. Khassawneh and C. Vladoi .................................................................. 827

Application of Fuzzy Logic in Design Failure Mode and Effects Analysis
N. Belu, D.C. Anghel and N. Rachieru ....................................................................................................... 832

Improving Maintenance Activities of Machine Tools
C. Deneș and V. Grecu ............................................................................................................................... 837
