Session 12 | Friday, 10 September

- Session 12 (Invited): Balancing Costs and Performances in Manufacturing Systems
  10.00-12.00 - Room 2.4
  Chair: Octavian Bologa (Romania)

  Improving the manufacturing accuracy of the profiling machines
  Biris Cristina, Vasile Marinescu, Octavian Bologa, Radu-Eugen Breaz, Cristian Deac, Melania Tera

  Low-cost solutions for manipulation tasks in manufacturing systems: balancing costs and performances
  Radu-Eugen Breaz, Octavian Bologa, Gabriel Racz, Oleksik Valentin, Gîrjob Claudia

  Web engineering and multi-criterion analysis of modeling languages used in production systems
  Marius Cioca, L.I. Cioca, L. Duta

  Aspects of improving the cost-performance ratio for the manufacturing of small-size cast parts
  Cristian Deac

  Modular device for determining forming limit curves – a cost effective approach
  Octavian Bologa, C. Gîrjob, G. Racz, N. Turcu, A. Blaga
